<ul style="list-style-type: none">• Acquired proficiency in Cloud Computing fundamentals.• Engineered a Kubernetes Cluster with Docker, showcasing hands-on experience in cloud infrastructure deployment.	

Projects

Password Manager (MERN Stack) — passmongoop.netlify.app

- Developed a full-stack password manager using MongoDB, Express.js, React, and Node.js (MERN).
- Implemented features like password generation, clipboard copy, and secure credential storage.
- Designed a clean and responsive user interface with Tailwind CSS.
- Focused on data security with hashed storage and organized backend architecture.

Book Rent – Airbnb Clone (MERN Stack) — bookandrent.netlify.app

- Created a vacation rental platform similar to Airbnb using the MERN stack.
- Integrated Firebase Authentication for secure login and user management.
- Implemented property listings, real-time booking, and location-based search filters.
- Built a responsive UI with Tailwind CSS for mobile-first design and seamless user experience.
